Danish Producer Responsibility

Reporting of electronics, batteries, and cars

DPA-System hereby informs companies abroad that by the beginning of the new year, it is time to calculate and report the volumes of products that are covered by producer responsibility legislation and put-on-market (POM) to end-users in Denmark in the calendar year 2020.

EU-DISTANCE SELLERS TO END USERS MUST HAVE AN AR

Please note that EU-companies selling directly to end users in Denmark are obligated to appoint an Authorized Representative (AR) in Denmark.

The column to the left shows the reporting company and the contact email your company has entered when the statutory registration for producer responsibility was established. Also, if the company by distance sales sell directly to Danish end-users from an EU-member state, the obligated Danish AR is also shown.

The purpose of this notice is simply to provide information about the opening and deadline for the 3-month reporting period. Also DPA wish to refer to the information and LOGIN pages on DPA's website. (Next page). We recommend that you consult the information pages before starting the report.

In short, the report relates to electronics, batteries and vehicles for Danish producers and importers. For foreign distance sellers to end users only the Electronic Equipment and WEEE are reported.

ELECTRICAL PRODUCTS AND BATTERIES

The volumes of produced or imported products that operate on electricity and the amounts of batteries imported in electrical products, in cars or for single sale, and which are sold on the Danish market in 2020.

The volumes of electronics and batteries put-on market are reported in exact kg (integer). It is the company itself or its collective scheme or Authorized Representative (AR) that reports to the producer responsibility register at www.dpa-system.dk. See details for the report via the links provided on the next page.

***The register opens 4. January and closes again 31. March
Non-reporting companies will be canceled from the register and
can hereafter not legally put complying products on Danish market.***

About Danish Producer Responsibility System

The Danish Producer Responsibility System (DPA-System) is a self-governing institution, which was established in 2005 pursuant to the Environmental Protection Act. The purpose is to develop, administer and operate a national and statutory register of manufacturers and importers of electrical and electronic equipment, batteries and automotive vehicles in accordance with European environmental legislation on producer responsibility.

It is DPA-Systems' task in Denmark to establish systems that support monitoring of the environmental objectives set out in the directives and in national legislation, and at the same time give producers the best opportunities to actively participate in realizing the objectives of market activities.

DPA-System collects and systematizes information and data about the resource sector, and willingly makes this knowledge available to companies, authorities and other stakeholders
